Veeam Backup *for Microsoft Office 365*

Total access, control and protection of Office 365 data

Microsoft provides a wide array of powerful services within Office 365 — but a comprehensive backup of your Office 365 data is not one of them.

Veeam® Backup *for Microsoft Office 365* eliminates the risk of losing access and control over your Office 365 data including Exchange Online, SharePoint Online and OneDrive for Business — so that your data is always Hyper-Available and protected.
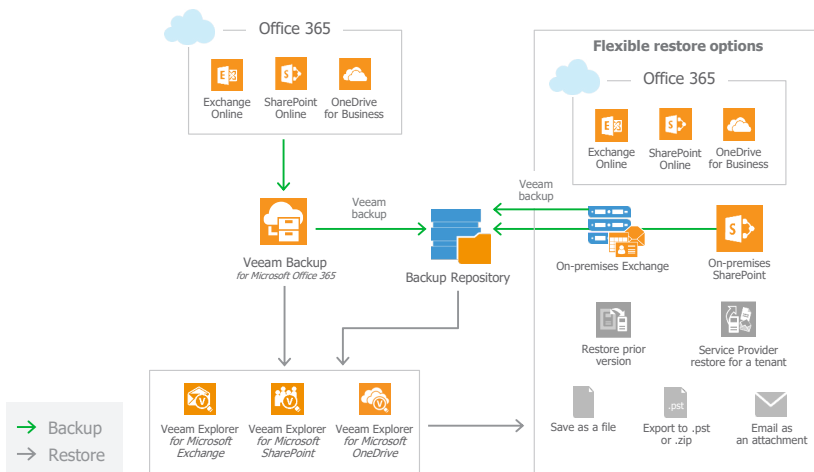

With Office 365, it's your data

Microsoft Office 365 enables your enterprise to work anywhere, anytime, without the need to host your own email, files and content management infrastructure. Even though Microsoft hosts the infrastructure, this doesn't replace your responsibility of maintaining a backup of your business-critical Office 365 data.

With Office 365, it's your data — you control it — and it is your responsibility to protect it.
With Veeam Backup *for Microsoft Office 365*, you can:

- **Protect your Office 365 data** from accidental deletion, security threats and retention policy gaps
- **Quickly restore individual Office 365 items and files** with industry-leading recovery flexibility
- **Meet legal and compliance requirements** with efficient eDiscovery of Office 365 backup archives

What's new in version 2

NEW! Data Protection for OneDrive for Business

Fast, efficient backup of Office 365 OneDrive for Business accounts with the ability to restore and export files and folders with the NEW Veeam Explorer™ *for Microsoft OneDrive*.

NEW! Data Protection for SharePoint

The ability to back up SharePoint Online and SharePoint on-premises with fast, flexible recovery of SharePoint sites, documents, libraries and lists with the already-familiar Veeam Explorer *for Microsoft SharePoint* now built-in.

ENHANCED! Major ease-of-use and backup flexibility improvements

in a newly redesigned job wizard to make set-up, search and maintaining visibility into your data easier than ever.

"With Veeam Backup *for Microsoft Office 365*, our customers will sleep soundly knowing that their emails are fully safe."

Jérémy Verda,
Executive System Engineer

Logical TIC SPRL

Backup Office 365 to any location

Hyper-Availability of Office 365 requires secure backup of SharePoint, OneDrive for Business and Exchange data to another location, to mitigate risk and ensure peace-of-mind that you'll be able to restore your users' data when needed.

- Retrieve Office 365 Exchange Online, SharePoint Online, and OneDrive for Business data from a cloud-based instance of Office 365 and uniquely backup the data weekly, daily, or as often as every five minutes in Microsoft's native format — an archive database based on Extensible Storage Engine (ESE), also known as the Jet Blue database

- Backup Exchange and SharePoint on-premises utilizing the same APIs as Office 365, reducing the impact to your datacenter and allowing more frequent backups of your users' data

- Store backups in the location of your choice — including on-premises, in a hyperscale public cloud (i.e. Microsoft Azure or Amazon Web Services) or with a local service provider

- Perform backups of unique and localized versions of Office 365, including support for U.S. Government (DoD and non-DoD), Office 365 Germany and Office 365 China

Restore Office 365 with industry-leading recovery flexibility

Never settle for less than reliable, granular restore of Office 365 email items, SharePoint sites, documents, libraries and lists as well as OneDrive for Business accounts, files and folders in a few simple clicks.

- Quick search and granular recovery of individual objects residing in a protected and archived copy of your Office 365 data

- Direct restoration of Office 365 items through an industry-leading number of ways giving you ultimate restore flexibility

eDiscovery of Office 365 data archives

Without an easily accessible copy of your data, retrieving emails for regulatory or compliance reasons can be costly, time consuming, and a major disruption to your business.

With Veeam, you can leverage the familiar, advanced search capabilities and the flexible recovery and export options to perform eDiscovery on Office 365 archives — just as easily as you would with a traditional on-premises data backup.

> "With Veeam Backup *for Microsoft Office 365*, we can **take back control** of our mailboxes. We can have our own off-site repository for safe keeping and we can recover lost emails with ease."

Meet compliance requirements

Compliance is a big driver for the need to backup Office 365.

- Store data based on long-term retention policies for regulatory or compliance needs

- Ensure you recover exactly what you need — no more, no less — with granular advanced search and find functionality

Efficiently scale and minimize overhead

Unmatched scalability with a multi-repository, multi-tenant architecture, comprehensive automation with full PowerShell and RESTful API support, as well as self-service restore for service provider's customers.

Unified on-premises and Office 365 backup

Veeam Backup *for Microsoft Office 365* also allows you to protect hybrid email and SharePoint deployments as well as migrate mailbox data between Office 365 and on-premises Exchange.
