

## Encrypt/Decrypt

Drag and Drop 'Add to Zip' in WinZip's Files Pane.

Direct Access Technology for faster display and unzipping.

Perform File Conversions before Zipping.

Easily remove personal data (EXIF) from various files so that when they are shared, your information is not included

**Quickly recover encrypted files left by past employees or during forensic audits.**

Easily encrypt an existing Zip file with a click of a button on the Tools ribbon

Update a Zip file, which contains encrypted files, with an automatically-encrypted replacement

Encrypted files within a Zip file cannot be deleted without knowing the password

Apply encryption and conversion options, including PDF conversion, watermarking and photo resizing, before, during or after creating your zip

Apply separate conversion options to individual files in your zip

Take advantage of hardware support in certain Intel-based computers for even faster AES encryption

Check 'Encrypt' to password protect your files using banking-level encryption and keep them completely secure

Secure sensitive data with strong, FIPS-197 certified AES encryption (128- and 256-bit)

**FIPS 140-2 encryption, both at rest and during exchange on a properly configured computer. Set to FIPS 140-2 compliance, even if Windows OS is not in FIPS 140-2 mode.**

Auto-wipe ('shred') temporarily extracted copies of encrypted files using the U.S. Department of Defense standard (DoD 5220.22-M) to prevent misuse

Establish your own password policy by defining complexity requirements

Encrypt and decrypt confidential files and email attachments

### WinZip Standard

## Manage

NEW! Find files faster with the built-in search feature.

NEW! Pin and access favorite files in the Quick Access section of the Files Pane.

NEW! Perform shell extension operations without leaving the WinZip Files Pane.

NEW! Use built-in cleaning tools to de-clutter your folders.

[NEW! Create and manage WinZip Jobs directly from the Explorer Context menu.](#)

ENHANCED! Set specific files to be "ignored" during routine cleaning scans.

ENHANCED! Create, configure, manage, schedule and run custom cleaning tools.

**ENHANCED! Use admin controls to set user permissions for Background Tools.**

Set Expiration Dates for Files and Folders

Option to view password entry

View Date taken and Date Modified

Rename multiple files at once

Slide to Hide Files and Action Panes

[Set Expiration Dates for Zip files and Log files](#)

[Expand the Preview Pane](#)

**Support Amazon S3/AWS regions**

Schedule File and Folder Clean Up using Background Tools

Manage Files with WinZip's built-in File Management

Quickly and easily reduce image file size by converting images from one format to another

Use WinZip Express to easily place a cloud link for any file onto the clipboard where it may be pasted into other apps for sharing

Manage your WinZip contact list; choose to not add one-time recipients and manually entered contacts

**Buttons for disabled features are hidden avoiding confusion.**

**Use the Classic interface - which hides the Files and Actions panes - allowing you to focus only on compression functionality.**

Add or move files from Explorer into a Zip file more easily with a new Move button alongside the Add button

Open, view and manage different folders at the same time using the Files Pane Tabs instead of using multiple Windows Explorer windows

Navigate through various folders using the Folder Trees option in the Files Pane

Expand or revert the Files Pane by swiping
